

Heribertus Rinto Wibowo

Brief profile

Hi, my name is Heri. A little bit about myself: I completed a Master of Public Health at Curtin University, in 2015. Currently, I work at Tulodo Indonesia, a consulting agency specialising in social and behavior change, as Research Officer.

For me, Curtin WhatsApp Group is a special networking group. We have a number of Curtin alumni across generation with various backgrounds and expertise. But do we really know each other in this group? To be honest, I personally just knew some people (Maybe I am just a little bit shy to say 'Hi' to others and sometimes I just don't know how to start conversation with other members). I hope that I could slowly break this wall of awkwardness😊.

I hope that by being one of Curtin Alumni Chapter committee members, I could contribute to create an Alumni Chapter that could facilitate its member in building network and friendships, and contribute to the wider Curtin alumni network. I hope that in the future, we could also organise a number of offline activities such as social and networking events to strengthen Curtin alumni network in Indonesia.

Thank you very much!
